## 2024\_28\_III\_OOPS Using Java Lab

### 2028\_REC\_OOPS using Java\_Week 3\_Q4

Attempt : 1  
Total Mark : 10  
Marks Obtained : 10

#### **Section 1 : Coding**

##### **1. Problem Statement**

Sesha is developing a weather monitoring system for a region with multiple weather stations. Each weather station collects temperature data hourly and stores it in a 2D array.

Write a program that can add the temperature data from two different weather stations to create a combined temperature record for the region.

##### ***Input Format***

The first line of input consists of two space-separated integers N and M, representing the number of rows and columns of the matrices, respectively.

The next N lines consist of M space-separated integers, representing the values of the first matrix.

The following N lines consist of M space-separated integers, representing the values of the second matrix.

#### ***Output Format***

The output prints the addition of the two matrices in N rows and M columns, representing the combined temperature record.

Refer to the sample output for formatting specifications.

#### ***Sample Test Case***

Input: 3 3

1 2 3

4 5 6

7 8 9

1 1 1

2 2 2

3 3 3

Output: 2 3 4

6 7 8

10 11 12

#### ***Answer***

```
// You are using Java
import java.util.*;
public class Main{
    public static void main(String[] args){
        Scanner s = new Scanner(System.in);

        //read rows and columns
        int N=s.nextInt();
        int M=s.nextInt();
        int[][] mat1=new int[N][M];
        int[][] mat2=new int[N][M];
        int[][] result=new int[N][M];

        //read first matrix
        for(int i=0;i<N;i++){
            for(int j=0;j<M;j++){
                mat1[i][j]=s.nextInt();
            }
        }

        //read second matrix
        for(int i=0;i<N;i++){
            for(int j=0;j<M;j++){
                mat2[i][j]=s.nextInt();
            }
        }

        //add matrices
        for(int i=0;i<N;i++){
            for(int j=0;j<M;j++){
                result[i][j]=mat1[i][j]+mat2[i][j];
            }
        }

        //print result
        for(int i=0;i<N;i++){
            for(int j=0;j<M;j++){
                System.out.print(result[i][j] + " ");
            }
            System.out.println();
        }
    }
}
```

```
        }  
  
    //read second matrix  
    for(int i=0;i<N;i++){  
        for(int j=0;j<M;j++){  
            mat2[i][j]=s.nextInt();  
        }  
    }  
  
    //add Matrices  
    for(int i=0;i<N;i++){  
        for(int j=0;j<M;j++){  
            result[i][j]=mat1[i][j]+mat2[i][j];  
        }  
    }  
  
    //print result  
    for(int i=0;i<N;i++){  
        for(int j=0;j<M;j++){  
            System.out.print(result[i][j]+" ");  
        }  
        System.out.println();  
    }  
}
```

**Status :** Correct

**Marks :** 10/10
